

Application No. 10/669,341 (CHEN) Amendment A, cont.

Amendment to the Abstract:

ABSTRACT:

A slidable windshield wiper for automobiles is provided. The windshield wiper has at least a wiper arm pivoted to a bottom of the windshield, ~~a wiper blade pivoted to a bottom of the windshield~~, a wiper blade pivoted to the top of the wiper arm, a blade rubber on the inner side of the wiper blade ~~closing~~ **directed toward** the windshield and an articulation rod having a hook connecting an elastic plate on the top of the wiper blade. The articulation rod has a sloped underside abutting a plane underside at lower end by which the wiper blade may slide about and form a certain angle relative to the wiper arm and moves up and downward following along with different tracks in order to completely clear the sight of the driver **who drives** ~~driving~~ in the rain.
